Model: VARI showing plant health
Min: -0.299
Max: 0.346

Areas of possible concern identified with explanation provided by owner

:

- A - area flooded by stream
- B - bare soil where carcass buried
- C - disturbed area around site of removed container
- D - degraded soil from previous burn pile
- E - subject to flooding from stream
- F - needs visual investigation

Dashed area has been recently sown with fresh pasture mix

Area outside of the dashed area is old pasture.

Note: VARI provides good indicative results. It displays the vegetation density and shows where crops are less dense than others. The red markers indicate crop stress points.
